PROJECTS

Work Wizard – Employee Dashboard – <https://github.com/jereid27/workWizard>

Developed a full-stack web application using Java, Spring Boot, HTML, CSS, and PostgreSQL. The application enables independent contractors to manage consultation notes, inventory, and payment logs with CRUD functionality. Implemented features include generating comprehensive payment history reports for enhanced financial tracking and management.

Vacation Bookings Application - <https://github.com/jereid27/Vacation-Website-Backend>

- Migrated a travel agency's legacy back end to Spring Framework. Set up, organized code, implemented entities, validated inputs, and designed RESTful controllers. Integrated sample data and successfully tested the application.
- Implemented Java for the backend and Angular for the front end.

Interactive World Map – <https://github.com/jereid27/World-Map>

- Developed an interactive world map web page using Angular.js, leveraging mouse events to highlight countries and display API-sourced facts upon interaction.
